**PROVIDING PdMA TESTING SERVICES FOR OUR CUSTOMERS FOR OVER 17+ YEARS!**

INDUSTRIAL PdMA TESTING EXPERTS

## REDUCE TOTAL COST OF OPERATION AND EMERGENCY REPAIR COST DUE TO UNPLANNED DOWNTIME

Improved motor reliability! The PdMA testing method is the single most powerful online electric motor testing tool available in the market today. Through the use of PdMA testing equipment, unexpected downtime and repair/replacement costs are significantly reduced as potential problems are detected before they can cause an unplanned failure. The use of PdMA testing has allowed Horner's customers the opportunity to properly plan their outages before the motor caused unexpected downtime. Learn more at www.HornerIndustrial.com

**PdMA testing allows your company the opportunity to:**

- **Provide a baseline of the motors condition at a particular time**
- **Prequalify motors before and after a repair or cleaning**
- **PdMA Testing analyzes data, defines problems and can isolate root causes of failures.**

# PdMA TESTING

**REDUCE TOTAL COST OF OPERATION AND EMERGENCY REPAIR COST DUE TO UNPLANNED DOWNTIME**

PdMA testing provides critical motor data on:

- Motor Winding
- Motor Lead Cables
- Power circuit health
- Power Quality
- Air Gap
- Condition of the Stator & Rotor

PdMA testing provides you with the critical information you need to make decisions for planned maintenance, instead of paying the exorbitant costs incurred with an unplanned failure.
